

Belarus

Dear Ladies and Gentlemen! My name is Mr. Alexei Vdovichev. I am a coordinator of the international activities and projects of the International Public Association "Voice of Heart". This is a charitable organization working in the Republic of Belarus. The main goal of our work is to help the disabled people in Belarus. Mostly we take care of the disabled children and young people in residential institutions, but also we pay much attention to assistance for orphan houses and people who suffered from ecological disasters (Chernobyl tragedy). The IPA "Voice of Heart" aims to improve the life of the disabled people and tries to introduce projects of social and labor rehabilitation, social adaptation and education in the residential institutions. There are 37 institutions like that in Belarus, and the people in them lack a lot of opportunities that they should have, because they have rights for such opportunities. But now it is very difficult to help them because of small financing from the state (all institutions are the state ones). Our organization has been working in this sphere for 2 years only, we do not have enough experience and finance, but now we are starting a joint project with the Swedish organization "SHIA", but it will deal only with one institution (in Belarus these institutions are also called "asylums") That's why we would like to find partners among organizations, funds, associations, etc., as to start new international activities and projects that will help to hit the goal of our organization. Besides, according to the legislature, the IPA "Voice of Heart" can be a representative of any foreign association on the territory of Belarus. We really hope for your Cooperation and Partnership. Hope to hear from you soon! Thank you! Sincerely Yours, Mr Alexei Vdovichev, Coordinator of the international activities and projects The IPA "Voice of Heart"
